DETAILED ACTION

Election/Restriction

Claims 1-16 and 23-27 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected inventions, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 12. (It is noted that Group IV is directed to claims 17-22 not 17-25.)

Applicant's election with traverse of the restriction in Paper No. 12 is acknowledged. The traversal is on the ground(s) that the dependent claims, rather than the independent claims, were addressed with regard to separate inventions. This is not found persuasive because to the fact that the specification provides no mention of using the invention in the production of toothpaste, its use in toothpaste is nonetheless well known. It is not clear, as applicants point out, which limitations are being ignored. With regard to the claimed concentrations, applicants ignore that both claims 26 and 27 are limited to using at least about 40% by weight of the alpha acids (see claim 23 from which they depend). As for the differentiation between a metal hydroxide and a metal salt that does not include a hydroxide, it is not seen, no matter how they are defined, how this makes the claims nonrestrictable.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1761

Claims 18, 20 and 22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 22 is indefinite because the scope of the term "about" is unknown.

Claim 18 is indefinite because the scope of the terms "substantially" and "slightly" is unknown.

Claim 20 is indefinite because the scope of the phrase "room temperature" is unknown.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 17-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Maye *et al.* (U.S. Pat. No. 5,583,262) ("Maye").

Maye teaches the production of beers using rho-isoalpha acids. The acids can be comprised of potassium, sodium, calcium or magnesium. (See claim 14 of patent). Examples 5-8 teach the specific examples of mixing aqueous alkaline solutions of about 35-40% rho-isoalpha acids with 6M aqueous solutions of metal salts at 65 C with stirring. Also see col. 5, lines 16-31. The resulting mixture has a pH of above 5. *Id.* The temperature of the final mixture would inherently be room temperature.
